

User Documentation

How to Install

- Open the Release.zip and run the "setup.exe". Then follow the instructions.
- Click on the "Next" button to select the folder Calculator will be installed in.
- The automatic folder of installation is "C:\Program Files\E!0\Calculator\". You can change it by clicking on the button "Browse..." and then select the drive and the folder you want to install calculator in.
- Select the user for which you want to install it among the two choices: "Everyone" and "Just me". Then click on the "Next" button.
- Confirm the installation by clicking the button "Next".
- Administration permissions are needed to start, press "Yes" to continue (in case if you press "No" the installation will be automatically closed).
- In a couple of time the Calculator will be installed on your computer. Click the "Close" button to exit from the installation window.

How to Uninstall

There are two ways how to Uninstall the Calculator from your computer:

Uninstallation with the Installer

- Open the Release.zip and run the "setup.exe".
- Choose the point "Remove Calculator"
- Click on the "Finish" button.
- Administration permissions are needed to start, press "Yes" to continue (in case if you press "No" the uninstallation will be automatically closed).
- In a couple of time the Calculator will be uninstalled from your computer. Click the "Close" button to exit from the uninstallation window.

Uninstallation with the "Add or Remove programs"

- Enter "Control Panel" in the search box on the taskbar, and then select "Control Panel" from the list of results.
- Select "Programs" then "Programs and Features."
- Type "Calculator" in the search window in the top left corner.
- Tap and hold (or right-click) on the "Calculator" and click "Uninstall".
- Administration permissions are needed to start, press "Yes" to continue (in case if you press "No" the uninstallation will be automatically closed).
- In a couple of time the Calculator will be uninstalled from your computer.

How to Use

- Open the Calculator.
- The result is located under expression section where the result and currently typed numbers are shown. (when you press any operator except "=" numbers will be moved to the data section and replaced with the number "0").
- Buttons in the Calculator are divided by two colors: gray is for numbers and decimal separator, and orange is for mathematical operations.
- You can put the numbers and perform mathematical operations using your keyboard (numpad section and digital section).
- Buttons "-" and "×" in the right top corner to minimize the application and close it accordingly.

Operations

- The result of operations with non-integer numbers outputs 5 decimal places.
- "+" – Adding numbers (enter the first number, press the "+" button and then enter the second number, click on "=" to see the result).
- "-" – Subtraction of the numbers (enter the first number, press the "-" button and then enter the second number, click on "=" to see the result). You can also use the subtraction operation to make the number negative (firstly press the button "-" and then enter the number).
- "*" – Multiplication of the numbers (enter the first number, press the "*" button and then enter the second number, click on "=" to see the result).
- "/" – Division of the numbers (enter the first number, press the "/" button and then enter the second number, click on "=" to see the result).
- "%" – Percentage of the number (enter the number and then click on the button "%") shows the 1% of the number.
- "Log" – Natural logarithm of the number (enter the number and then click on the button "Log").
- "!" – Factorial of the number (enter the number and then click on the button "!").
- " $\sqrt{}$ " – Root of the number (enter the number you want to find root of, click on the button " $\sqrt{}$ " and then enter the number of the root degree, finally press the button "=").
- " x^y " – Exponentiation of the number (enter the number you want to raise to a power, click on the button " x^y ", enter the number of an exponent, finally press the button "=").
- "=" – Equals key (press the button "=" to see the results).
- "C" – Clear key (press the button "C" to clear the memory).
- "←" – Deletion of the last sign (press the button "←" to delete the last sign from the screen).
